Social Media and Remote Runner Tracking

For the Runner—Runner Broadcast Service

Runners may announce their progress every 10K of the marathon course by automatically posting timing updates on their Facebook timeline or over their Twitter feed.

By broadcasting split times, runners will be able to effectively inform every friend or follower of their triumphant trek through the nation’s capital. MCM10K participants can share their finish results.

For the Supporter—Track a Runner

Relatives, friends, and running buddies will all be able to follow a runner’s progress along the MCM course in real time.

The virtual support crew can sign up to receive updates for one or multiple runners from the 10K, 20K, 30K, 40K, and finish-line split locations.

The timing data will be delivered by text, sent via email, posted on personal Facebook pages, and/or sent over Twitter feed. Track a Runner services are supported by Arlington, Hyundai, and Aetna.
